The Principles for Responsible Investment contain six pledges with 35 action items. The six main principles are directed at key aspects of the investment management process:

1. **Research:** Incorporate ESG issues into investment analysis and decision-making processes
2. **Engagement:** Be active owners and incorporate ESG issues into ownership policies and practices
3. **Disclosure:** Seek appropriate disclosure on ESG issues from portfolio companies
4. **Communication:** Promote acceptance and implementation of the principles by setting expectations and requirements for investment service providers
5. **Collaboration:** Work collectively to enhance the effectiveness of implementing the principles through networks and information platforms
6. **Accountability:** Share with beneficiaries how ESG issues are being integrated in investment practices and the impact they are having on fund holdings and the investment community at large
